

BGSC Platform — Features & Experience Guide

The Digital Home for BITS Goa Sports, Esports & Fitness

1. Welcome to BGSC

The BGSC Platform is the unified digital hub for everything sports, esports, and fitness at BITS Goa. Whether you are a casual player looking for weekend events, a competitive gamer chasing leaderboard glory, or an organizer running campus-wide leagues — this platform brings the entire community together in one place.

Built around the philosophy of “**Events First, Community Always,**” the platform makes discovering events effortless, gamifies participation through points and rewards, and gives the organizing committees powerful tools to execute world-class tournaments and leagues.

What Makes It Different?

- **One App, Every Community:** From football leagues to Valorant tournaments to FitSoc challenges — everything lives here.
- **Play for Your Sponsor:** Every student affiliates with a campus sponsor and earns “fans” for them by winning events, creating friendly inter-sponsor rivalry.
- **Your Player Identity:** A customizable digital player card that showcases your stats, interests, and achievements — shareable anywhere.
- **Built for Organizers Too:** A dedicated internal workspace (Union Page) helps BGSC, BGEC, and FitSoc crews plan events, assign tasks, and run auctions without chaos.

2. Who Is This For?

Persona	Who They Are	What They Do on BGSC
Guest / Visitor	Anyone browsing without an account	Browse public events, announcements, and media
Student / Player	BITS Goa student who loves sports or gaming	Register for events, join teams, earn points, connect with friends, redeem merch
Team Captain	Leader forming squads for leagues	Create teams, manage rosters, bid in player auctions, track match schedules
Crew Member	BGSC/BGEC/FitSoc volunteer	Access internal tasks, update event details, help with operations
Core Organizer	Event managers and workspace leads	Manage events end-to-end, review registrations, configure brackets, run auctions
Coordinator	Top-level operational heads	Oversee all events, manage sponsors, promote crew roles, broadcast announcements
Founder / Admin	Platform owners	Full system governance, security, sponsor onboarding, audit oversight

3. The Core Experience Pillars

3.1 Discover & Register for Events

Events are the heartbeat of the platform. Students can:

- Browse upcoming, ongoing, and past events across **Sports, Esports, and Fitness**.
- Filter by category: Leagues, BGEC Events, FitSoc Events, or General Highlight Events.
- View rich event details: rules, awards, venue maps, schedules, and coordinator contacts.
- Register as a **solo participant** or form/join a **team** for teamed tournaments.
- Track registration deadlines and receive reminders as events approach.

Special Event Types:

- **Direct Events (DE):** Show up and play — no complex brackets.
- **Leaderboard Events (LE):** Compete for ranks with live score tracking.
- **Leagues (ALL / DLL):** Full seasonal competitions with brackets, match schedules, and finals.
- **Auction-Based Leagues:** Captains bid on players using a virtual purse to build dream teams.

3.2 The Sponsor System — Play for a Brand

Every student picks an **active sponsor** during onboarding (changeable once per semester). This creates a unique competitive layer:

- **Earn Fans:** Win events or complete challenges to earn virtual “fans” for your sponsor.
- **Sponsor Leaderboard:** Watch sponsors climb rankings based on total fans earned by their affiliated students.
- **Prizes:** Top contributors and winning sponsors receive prizes at the end of each tenure.
- **Sponsor Archive:** Browse past sponsors, their events, and legacy media.

3.3 Your Player Card & Profile

Your identity on the platform goes beyond a name:

- **Player Card:** A stylized, animated card showing your username, avatar, bio, interests, custom tags (e.g., “Striker,” “IGL”), and sponsor badge.
- **Activity Feeds:** Connect Strava (for physical sports) and Steam (for gaming) to auto-display recent activity.
- **Achievements & History:** Events played, challenges completed, fans earned, and match records.
- **Social Handles:** Link Instagram, Twitch, Discord, and WhatsApp.
- **Shareable Export:** Turn your player card into an image for Instagram or stories.

3.4 Friends, Teams & Matchmaking

- **Friend System:** Send requests, chat via DMs or group chats, see who is online.
- **Find Players:** Discover teammates based on shared interests, mutual friends, or sponsor affiliation.
- **Team Up:** Invite friends directly into events or browse open public teams looking for members.

- **Challenge Friends:** Send physical or digital challenges to friends and earn points.

3.5 Points, Challenges & The Store

- **Earn Points:** Participate in events, complete challenges, engage socially, and win for your sponsor.
- **Spend Points:** Redeem merchandise, indie games, or invest points into leaderboards to boost your rank.
- **Challenges:** Browse challenges by domain (Sports, Esports, Game Dev, General) and difficulty (Easy → Legend). Legend completions grant **Hall of Fame** entry.
- **Transaction History:** Full transparency on how you earned and spent every point.

3.6 Media & Memories

- **Event Albums:** Auto-generated photo galleries for every major event (Offside, Waves, etc.).
- **Community Uploads:** Students share clips and photos from events.
- **Year in Review:** Auto-compiled personal highlight reel of your year in sports and gaming.
- **Masonry Grid:** Beautiful, Pinterest-style browsing with smart filtering by event, date, or sponsor.

3.7 Announcements & News

- **Home Feed:** Centralized broadcast of all official announcements from coordinators.
 - **Categories:** Filter by BGEC, FitSoc, Airball, Offside, PowerPlay, Deuce, Around The Net, and more.
 - **Coordinator Voices:** A fun, comic-style section showing what BGSC heads have to say — with memes when they are quiet.
 - **Newsletters:** Subscribe to gaming industry news, indie spotlights, and campus studio updates.
-

4. Feature Deep Dive by Module

4.1 Home Page — The Landing Experience

For: Everyone (Guests + Authenticated)

Three tabs designed for quick consumption:

1. **Introduction:** Catchy one-liners, campus sports culture highlights, and sub-community intros (BGSC, BGEC, FitSoc).
2. **Announcements:** The official broadcast channel. Only the last 4 months shown to keep content fresh.
3. **Social Feed:** Public posts from the community. Guests see content; authenticated users can add their own.

Key Interaction: A floating “Add Post” button lets authenticated users share media instantly. Guests are gently nudged to log in.

4.2 Events Page — The Action Center

For: Everyone to browse; Authenticated to register

- **Category Tabs:** Leagues, BGEC, FitSoc, General Events.
- **Smart Filters:** Past, Upcoming, Ongoing — view any combination simultaneously.

- **Event Details:** Rich descriptions, rules PDFs, award lists, venue info, and coordinator contacts.
- **Registration Flow:** Simple sign-up with role selection (Captain or Member). Captains can name their team, set invite codes, and control team visibility (Open / Invite Only / Closed).
- **Team Formation:** Search registered teams, send join requests, or invite others to your squad.
- **Live Brackets:** Spectators view beautifully rendered bracket trees (Round Robin, Single/Double Elimination). Tap any match to see rosters, venue, and live scores.
- **Auction Spectator Mode:** Watch live player auctions unfold — see current bids, countdown timers, captain wallets, and bid history in real time.

4.3 User Profile — Your Sports Identity

For: Authenticated users

- **Custom Status Bar:** Quick access to account actions and profile picture updates.
- **Player Card (Centerpiece):** Animated, shareable, and matchmaking-ready.
- **Sponsor Stats:** Current sponsor badge, personal fan contributions, events won for sponsor, and sponsor ranking.
- **Event Suggestions:** Upcoming events tailored to your interests, plus discovery of new categories.
- **Friend Suggestions:** Based on contacts, shared events, or mutual interests.
- **History:** Complete log of events, games, challenges, and sponsor contributions.

4.4 Friends Page — The Social Layer

For: Authenticated users

Five dedicated tabs:

1. **Chats & Search:** DM and group chat list, friend search with mutuals/activity preview, and incoming/outgoing request management.
2. **Activities & Events:** See what events your friends have played in.
3. **Recent Achievements:** Celebrate friend wins and sponsor contributions.
4. **Challenge Friends:** Browse and send challenge invitations.
5. **Team Up:** Coordinate squad formation for upcoming events.

4.5 Points & Challenges — The Gamification Engine

For: Authenticated users

Points System:

- Balance display with visual breakdown of sources (events, challenges, engagement, sponsor bonuses).
- Transaction history for full auditability.
- Spending options: Store redemption and leaderboard investment.

Challenge System:

- **Browser:** Filter by domain, difficulty, team limits, and time constraints.
- **Types:** Physical (requires space/time) or Digital (timeline-based with hidden details until accepted).
- **Progress Tracking:** Submit proof, track completion, and claim points.

- **Hall of Fame Entry:** Complete Legend challenges to earn permanent recognition.

4.6 Leaderboards — The Competition Stage

For: Public viewing; Authenticated participation

- View all active events with live leaderboards.
- Filter by tags, participation status, or event type.
- **Points Investment:** Participants can strategically invest points to improve their rank (where permitted).
- Supports multiple formats: Round Robin, Upper-Lower Brackets, Direct Elimination, and Elimination after N fails.
- Score normalization ensures fairness across different sports metrics.

4.7 Hall of Fame — The Legacy Wall

For: Public

Aesthetic, browsable collection of all winners across:

- League Winners (per sport/esport)
- Highlight Event Winners
- Challenge Legends
- **Sponsor Champions:** Top sponsor per semester, MVP contributors, and dynasty tracking (consecutive wins).

Winner cards include event name, date, trophy icon, winner quote, and sponsor affiliation. Fully filterable and shareable.

4.8 Store — The Redemption Hub

For: Authenticated users

Merchandise:

- Browse physical and digital merch with points pricing.
- Cart and checkout flow with order tracking (Pending → Processing → Shipped → Delivered).

Indie Game Support:

- Discover games developed by campus studios or partner studios.
- Download or redeem with points.

Friendly Games Jam:

- Pitch game ideas, upvote community concepts, and collaborate with campus developers.

4.9 Sponsor / Newsletters Page

For: Public

- **Active Sponsors:** Current tenure display with countdown, sponsor cards (logo, fans, ranking, affiliated users), and visual fan distribution charts.

- **User Affiliation:** See your current sponsor, contribution breakdown, and change sponsor (once per semester).
- **Prizes & Rewards:** View preset prize pools, current leaders, and claim status.
- **Sponsor Archive:** Browse past sponsors, their events, and legacy media.
- **Newsletters:** Gaming industry updates, indie spotlights, and dev tutorials with subscribe management.

4.10 Media Page — Visual Storytelling

For: Public (with permission filtering)

- **Masonry Grid:** Lazy-loaded, responsive layout adapting to any screen.
- **Sections:** Event Albums, Community Uploads, Personal Memories, Sponsor Galleries.
- **Filters:** Event tag, date range, uploader, media type, sponsor.
- **Actions:** Download, share, add to memories, or report content.
- **Permissions:** Public (guest-visible), Private (friends-only), or Event-specific.

4.11 Feedback & Contact

For: Public

- **Ticket System:** Submit bugs, feature requests, or complaints with severity levels and attachments. Track status from submission to resolution.
- **Contact Directory:** Current and past coordinators with roles, emails, and masked WhatsApp numbers (click to reveal).
- **FAQ:** Searchable accordion covering accounts, events, points, union, technical issues, privacy, and sponsors.

5. Internal Workspace: The Union Page

For: Crew Members, Core, Coordinators, Founders only

The Union Page is the operational backbone — a private workspace where organizing committees plan, execute, and celebrate events.

Task & Project Management

- **Quick Add:** Instantly log tasks on-the-go without full details.
- **Strict Add (Web):** Comprehensive task creation with deadlines, assignees, priorities, and sub-tasks.
- **Hierarchy:** Main Tasks (milestones) → Grouped Tasks (categories) → Mini Tasks (checklists) → Pathway Tasks (long-running tracks with auto-abandonment if inactive).
- **Multiple Views:** Switch between List, Gantt Chart, Calendar, and Kanban Board views.
- **Task Privacy:** Public to all Union members or restricted to assigned personnel.
- **Updates:** Threaded timeline with comments and file attachments per task.
- **Heatmaps:** Visual calendar showing crew availability and workload to prevent burnout.

Team Coordination

- **Auto-Generated Chats:** Every task gets a dedicated group chat for seamless discussion.

- **Google Calendar Sync:** Two-way integration pulling academic timetables and pushing task deadlines + meeting invites.
 - **Role-Based Access:** Strict 5-tier system ensuring crew only sees what they need.
-

6. Real-World Use Cases & Scenarios

Scenario 1: The Casual Player — “I Just Want to Play”

Priya hears about a weekend badminton tournament. She opens the BGSC app, browses the Events page, and filters for “Upcoming” and “Sports.” She finds the tournament, reads the rules PDF, and taps “Register.” She selects “Solo” and pays nothing (points-based events are free to enter). She gets an in-app reminder 24 hours before the event. After playing, she checks the leaderboard and sees her name. She earned 50 points and 10 fans for her sponsor, **Nike**. She feels good and shares her player card to Instagram.

Features used: Event browsing, Registration, Notifications, Leaderboard, Points, Sponsor Fans, Player Card Share.

Scenario 2: The Team Captain — “Building a Dream Squad”

Arjun wants to enter the **Offside Football League**. He applies for Captain role during registration. A Core organizer approves him. The league uses an **Auction System**. Arjun enters the Auction Hub with a virtual purse of 5,000 points. He sees player base prices and strategically bids on a striker and a goalkeeper. The live countdown adds tension. He wins both players, and his team “Phoenix” is auto-formed. He then invites two friends as remaining members via the Team Formation page. On match day, he checks the bracket tree to see who Phoenix faces next.

Features used: Captain Request, Auction Bidding, Live Timer, Team Formation, Bracket View, Friend Invites.

Scenario 3: The Core Organizer — “Running the Show”

Riya is a Core member managing the **Valorant League**. She opens the **Web Admin Workspace** (PWA) on her laptop. She uses the **Structural Event Builder** to create the league, uploads the rules PDF, sets registration deadlines, and assigns 3 crew members as referees. She then opens the **Visual Bracket Generator**, selects “Double Elimination,” and seeds the 16 registered teams. During matches, she enters scores via the **Dynamic Rule Scoring Engine** (kills, deaths, bomb defuses). The leaderboard auto-updates. Post-event, she publishes results, and the system automatically awards fans to winning players’ sponsors. She then checks the **Union Page** to ensure her crew completed all post-event tasks.

Features used: Event Builder, Bracket Generator, Score Engine, Union Task Management, Auto Fan Awards, Role Assignment.

Scenario 4: The Coordinator — “Campus-Wide Communication”

The **BGSC Head** needs to announce that Waves registration is open. She opens the **Make Announcement Popup**, writes the title and body, selects the “Highlight Events” tag, and hits publish. The announcement instantly appears on every student’s Home page. Because the platform is integrated with WhatsApp, it also auto-broadcasts to the Waves community group. She then checks the **Sponsor Leaderboard** and sees that **Adidas** has overtaken **Puma** this week. She prepares a motivational post for the sponsor channel.

Features used: Announcement Creation, WhatsApp Broadcast, Sponsor Leaderboard, Multi-Channel Notifications.

Scenario 5: The Fitness Enthusiast — “Tracking Real Activity”

Karan is a FitSoc regular. He connects his **Strava** account in Settings. His weekly runs and workouts now appear on his BGSC profile under “Sport Activity.” He joins the “**Run 50K in a Month**” Challenge. He tracks progress in-app, and upon completion, he earns 200 points and a Legend badge. His sponsor, **Decathlon**, gains 25 fans. He redeems his points for a BGSC hoodie in the Store. He also checks his **Year in Review** memory compilation and sees a beautiful montage of his fitness journey.

Features used: Strava Integration, Challenges, Points Redemption, Store Checkout, Sponsor Fans, Media Memories.

Scenario 6: The Gamer & Streamer — “Esports Identity”

Neha connects her **Steam** and **Discord** accounts. Her profile now shows her top games, total playtime, and Discord status. She registers for the **BGEC CS2 Tournament** as a team member. Her captain drafts her via the auction. She uses the **Friends Page** to DM her teammates and coordinate practice times. After winning the tournament, her Player Card updates with a “CS2 Champion” tag. She exports her card and tweets it. She also wins a sponsor prize — a gaming mouse from **HyperX** — because she was a top fan contributor that semester.

Features used: Steam Integration, Discord Integration, Team Chat, Auction, Player Card Export, Sponsor Prizes.

Scenario 7: The New Student — “Onboarding Journey”

Aman downloads the app on his first day. The **Get Started Popup** walks him through:

1. Selecting interests (Football, Valorant, Game Development).
2. Picking his sponsor (he chooses **Puma** because his senior recommended it).
3. Adding friends from suggestions based on shared interests.
4. Connecting his Instagram and Discord. He now has a complete profile, a sponsor badge, and a feed full of relevant events. He registers for a casual football event happening that weekend.

Features used: Onboarding Flow, Interest Selection, Sponsor Selection, Friend Suggestions, Social Connect, Event Registration.

Scenario 8: The Content Creator — “Sharing the Culture”

Sana attends the **Offside** finale. She takes photos and videos. She opens the **Add Post Popup**, selects media from her gallery, tags the post with **#Offside** and **#Football**, writes a caption, and sets visibility to “Public.” The post appears on the General Social Feed and is auto-archived in the **Offside Event Album** on the Media page. Other students like and comment. She also uploads a video to her **Memories** collection for personal keepsake.

Features used: Add Post, Media Upload, Tagging, Privacy Controls, Event Albums, Social Interactions.

Scenario 9: The Union Crew — “Behind the Scenes”

The **BGSC Events Team** has 20 tasks to complete before Waves. The Core lead creates a **Pathway Task** called “Waves 2026 Execution” with sub-tasks for venue booking, marketing, registration desk, and closing ceremony. Each sub-task is assigned to 2 crew members with deadlines. The team uses the **auto-generated chat** inside each task card to coordinate. They sync their personal Google Calendars so no one double-books. The Coordinator checks the **Crew Allocation Heatmap** and sees that 3 members are overloaded, so she redistributes tasks. Everything is on track.

Features used: Task Creation, Pathway Tasks, Auto Chats, Google Calendar Sync, Heatmaps, Task Assignment.

Scenario 10: The Founder — “Platform Governance”

The **Admin** notices a user report about inappropriate content. He opens the **Users Page**, finds the reported post, and places it under review. He checks the **Audit Log Explorer** to see the full history of who posted what and when. He then runs the **Impersonation Sandbox** to view the user’s session safely for debugging. He issues a 7-day temporary ban, which is logged immutably. Later, he uses the **Sponsor Onboarding Wizard** to add a new sponsor for the next semester, uploading their logo, setting tenure dates, and configuring prize tiers. Finally, he runs the **Tenure End Settlement** script to close the current semester, calculate final sponsor rankings, and auto-distribute digital certificates to winners.

Features used: Moderation Queue, Audit Logs, Impersonation Sandbox, Ban System, Sponsor Onboarding, Tenure Settlement, Role Management.

7. Key Benefits Summary

For Students	For Organizers	For Sponsors
One-stop discovery for all campus sports & esports	Powerful task management & crew coordination	Direct engagement with highly active student community
Gamified participation with points & rewards	Live auction & bracket management tools	Measurable fan engagement & brand loyalty

Table 2 – continued

For Students	For Organizers	For Sponsors
Social matchmaking & team formation	Automated announcements & calendar sync	Historical archive & legacy visibility
Shareable player identity & achievements	Audit trails & role-based security	Prize distribution & ROI tracking
Store redemptions & challenge glory	Web-based heavy config (no mobile bloat)	Competitive rivalry driving participation

8. Privacy & Safety First

- **You control your visibility:** Profile, posts, and activity can be Public, Friends-Only, or Private.
- **Ephemeral posts:** “Non-Judgmental” and “Close” modes let you share 24-hour stories to select circles.
- **Content moderation:** Auto-filtering + human review queue keeps the community safe.
- **Account control:** Full data export, soft-disable, or permanent deletion with grace periods.
- **Secure actions:** Sensitive organizer actions require two-factor authentication.

BGSC Platform — Built by the community, for the community.
